

Pupils of schools and educational centers visited Turin Polytechnic University in Tashkent.

Turin Polytechnic University in Tashkent (TTPU) is of great interest to many applicants. Many schools have visited TTPU to get acquainted with all its possibilities and conditions.

The tours began with a short acquaintance with the multidisciplinary activity of the university and the history of its creation in collaboration with the Turin Polytechnic University (Italy), which is one of the ten best universities in the field of engineering in Europe. The schoolchildren were also impressed by the fact that training is conducted exclusively in English, that the academic program and procedure is fully established by TPU-Italy and that upon graduation from the university 2 diplomas are issued, one is issued by TPU-Italy, which is recognized in more than 120 countries of the world, and the second is issued by Turin Polytechnic University in Tashkent.

Then, student volunteers took a tour all over the university campus – 2 academic buildings, closed and open air libraries, a sports complex, basketball and football stadiums and a new skate park, where now there are a skateboarding ramp and a climbing wall.

Schoolchildren also got acquainted with the latest projects of university students in the Mechatronics center and Technopark, where all the opportunities for the implementation of innovative ideas are equipped and given for the disposal of university students.

We hope that we were able to at least partially familiarize

our guests with the capabilities of our university.

We will be looking forward to seeing You again!
