

Erasmus Plus empowers development of training and research landscape on Intelligent Big Data Analysis in Uzbekistan

The team members of the ELBA project, Mr.Mansur Asranov, and Mr.Khamidulla Khabibullaev, conducted an online seminar for the Network Center at Tashkent University of Information Technologies. Mr.Mansur Asranov focused his speech on the opportunities provided by the Erasmus Plus CBHE Joint Projects program, and ongoing projects in TTPU, such as #ELBA, #ERAMCA, #MechUZ, #MUSAE, and #SPACECO. He also highlighted its impact on the development of the training and research landscape of Uzbekistan, especially in the field of Intelligent Big Data Analysis (IBDA). Mr.Khamidulla Khabibullaev provided comprehensive information about the outputs of the #ELBA project, such as the newly developed course package, IBDA training, and research center infrastructure specifications.

Development of the IBDA course package in the framework of the Erasmus+ ELBA project

Introduction to Intelligent BigData Analysis

- Labs on process and methods in data science
- Machine Learning for IoT
- Computer modelling for big data processing
- Data Management and Visualization
- Data Mining
- Computational linear algebra for large-scale problems
- Decision making optimization
- Machine Learning and Computer Statistics
- Fundamentals of Data Science

The project facts and results were welcomed by the attendants with great interest.

Moreover, the ELBA project team members shared their experiences and motivated professors and researchers from the hosting center to step into “The amazing world of Erasmus+”.
