The meeting started with a welcome speech of Carlos Rodrigues, president of IPVC. He stated that the cooperation of European and Uzbek universities in the frame of this project will provide great opportunities for developing sustainable networking even at the period when the project activities are finished.

Representatives of IPVC prepared quite a broad agenda of activities which includes discussion of key issues related to the project, trainings for teachers and engineers and also cultural events. Other representatives also made a very useful

presentation about the current status of Work Packages and other issues regarding the project.

TTPU representative Seyran Asanov presented information regarding the established i-Labs at Turin Polytechnic University in Tashkent

According to the presentations, all HEI performed quite well in the development of laboratories in the frame of the project.
