

Our students were included in the Uzbek Student Almanac “Ziyolilar”

There are many ambitious students at the Turin Polytechnic University in Tashkent, who never stop improving themselves!

As proof of this, three students from our university were included in the Uzbek Student Almanac “Ziyolilar”, which is published annually and contains profiles of the best students throughout the country.

These three are **Saidakbarkhan Pulatov**, **Akbar Imamov** and **Jasur Mustafoyev**, all undergraduate students of the Faculty of Mechanical Engineering.

The main goal of the “Ziyolilar” project is to explore how young people succeed through their work and ambitions, the challenges they faced, their plans for the future, and a host of other fascinating information.

For information, anyone can get acquainted with this book in the university library.
