

Italy hosted the first defense of a Ph.D. dissertation which was held within the framework of the double degree program (Cotutelle) between TTPU and Politecnico di Torino.

On March 6th this year, the first defense of a Ph.D. dissertation within the framework of the double degree program (Cotutelle) between Turin Polytechnic University in Tashkent (Uzbekistan) and Politecnico di Torino (Italy) was successfully held at Politecnico di Torino (Italy).

Jasurkhuja Kholkhodjaev, a young researcher from Uzbekistan, defended his Ph.D. dissertation on the topic "Innovative geometrical and mechanical characterization of metallic components", carried out under the supervision of DSc. J.Sh. Inoyatkhodjaev (TTPU) and Professor Gianfranco Genta (Politecnico di Torino).

The Commission, composed of the teaching staff of both universities, highly appreciated the work done, noting its importance and relevance in modern industry and wished him further success in his scientific activities.
