

Practice on determining the seismic strength of multi-storey residential buildings is being carried out

In order to ensure the implementation of paragraph 16.4 of the Decree №-144 of the President of the Republic of Uzbekistan dated May 30, 2022 “On measures to further improve the system of seismic safety of the Republic of Uzbekistan”, an intensive course on modeling of buildings and structures using modern computer programs was organized by specialists of Turin Polytechnic University in Tashkent.

Professors and teachers, PhD and graduate students of Namangan Engineering-Construction Institute, Fergana Polytechnic Institute, Jizzakh Polytechnic Institute, participated in the organized intensive course. Japanese seismologist Professor Chikahiro Minova took part in this exercise along with our country's scientists.
