

# **Another meeting of the participants of the Erasmus+ CBHE MechaUz project consortium took place in Latvia**

From June 20th to 22nd of the current year, the Latvian project partners hosted all members of the consortium, including representatives from the Turin Polytechnic University in Tashkent.

The first day of the event was held at Riga Technical University. Special attention was paid to the analysis of the achieved results, the development of a concept for the sustainable development of the mechatronics and robotics field, as well as the financial summary of the project's activities.

The second day of the event took place in Valmiera, where representatives from Vidzeme University of Applied Sciences introduced the guests to the university's infrastructure and

ongoing projects. Later, a visit to the Vidzeme Business Incubator was organized, providing an opportunity to interact with their representatives regarding the involvement of the younger generation in scientific activities and its transformation into innovative implementation.

The final day of the event was held in the city of Liepaja, where the event attendees had the honor of familiarizing themselves with the structure of Liepaja University, its infrastructure, and teaching methods. Later that same day, a tour of the AE Partner enterprise, which specializes in automation systems for various industries was organized.
