

# **The 2nd International Scientific and Practical Conference “Mechatronics and Robotics: problems and prospects of development” was held at the Andijan Engineering Institute.**

About 50 professors and lecturers from prestigious higher educational institutions of our country and Europe, including the University of Turin in Tashkent, took part in the conference held on the eve of the completion of the project “Mechatronics-modernization of the bachelor’s degree in mechatronics and robotics in Uzbekistan based on innovative ideas and digital technologies”, implemented within the framework of the European Union’s Erasmus+, including the rector and the teaching staff of Turin Polytechnic University in Tashkent.

At the opening ceremony of the conference, the Rector of the Institute Umid Turdialiev, speaking, wished the participants success, noting that in recent years Mechatronics and robotics have been focused on the development of an educational direction based on national priorities, with the help of innovative ideas and digital technologies in higher education.

In the afternoon, the participants were divided into departments, analyzed the results of scientific research and discussed a number of current tasks, discussing the successes achieved and the problems they expect to be solved.

Also, within the framework of the event, the guests of the

university got acquainted with the laboratory base of the university, after which a visit to the UzAuto Motors automobile plant was organized for the guests of the event.
