

Results of the business trip of the Rector of Turin Polytechnic University to Italy

During the business trip to Italy on February 20, 2024 Chairman of the Board of “Uzavtosanoat” JSC Ulugbek Rozukulov and Rector of Turin Polytechnic University Olimjon Tuichiev visited a large Italian enterprise for the production of automotive equipment, “IVECO” (Industrial Village Complex).

The main purpose of this visit was to study the best practices in organising the production of electric vehicles with high energy efficiency and environmental characteristics that meet international standards. Within the framework of active implementation of projects on production of batteries for electric vehicles as a supplement to internal combustion engines, car manufacturers of leading countries are striving for sustainable development and compliance with environmental standards.

As part of the trip programme to Italy on February 21, members of our delegation held important talks with key representatives of the Politecnico di Torino. The opportunity to discuss the long-standing co-operation with the leading university was provided at the meeting with the current Rector Guido Sarakko, Professor Anita Tabakko, as well as the newly elected Rector Stefano Paolo Corgnati.

Dr. Ulugbek Rozukulov
UzAuto
Chairman of the Board

Particular attention was paid to the lecture by Ulugbek Rozukulov, Chairman of the Board of Uzavtosanoat JSC, on “The Automotive Industry of Uzbekistan”, which attracted the attention of students, professors and representatives of the world’s leading companies, creating a unique platform for the exchange of knowledge and experience.

This event was an important step in strengthening cooperation between Uzbekistan and Italy in the field of education and innovation, and created fruitful prospects for future projects and research.
