

International ICT exhibition and conference “IndiaSoft-2020” and “GlobalSoft-2020”

On March 3-4 of this year, the international conference and exhibition IndiaSoft-2020 and GlobalSoft-2020 were held in Hyderabad, India.

The conference was participated by more than 200 IT companies from different countries. They presented and shared the latest technological innovations and experiences in the field of information technology according to their activities to the delegates from more than 60 countries.

Among participants from these countries, 19 delegates from Uzbekistan participated in these occasions, among which were representatives from Turin Polytechnic University in Tashkent: Professor Muslimlimbek Pirnazarov, student Jamshid Ergashov and university graduates working in their specialty Zohid Akbarov, Sukhrob Shakirov and Begzod Khudzhanazarov.

A university student, Jamshid Ergashov, who attended the conference and exhibition, said: “During this two-day event, I had the opportunity to get acquainted with many managers and programmers who offered us their software solutions.

In particular, at a meeting I was impressed by IT solutions presented by the representatives of “World1 Solutions-IT consulting and education” and “Radius innovation systems”, and invited them to visit our university. The statement “Software is eating the world” made a strong impression on me. The share of software in the global market is growing rapidly. In this situation, we, young people, cannot calmly look around, we should try to effectively use our precious time, learning

programming and applying it in life. I am grateful to the administration of our university and the Carwon team in which I work for helping me to participate in this event. ”
